| UK OV1: Overview of risk weighted exposure amounts   | 8    |
| UK OVC: ICAAP information  | 8    |
| UK CR8: RWA flow statement of credit risk exposures under the IRB approach   | 9    |
| Annex VII: Capital   |      |
| UK CC1: Composition of regulatory own funds  | 10   |
| UK CC2: reconciliation of regulatory own funds to balance sheet in the audited financial statements                | 14   |
| TLAC2: Creditor ranking - Entity that is not a resolution entity   | 15   |
| Annex IX: Countercyclical capital buffers  |      |
| UK CCyB1: Geographical distribution of credit exposures relevant for the calculation of the countercyclical buffer | 16   |
| UK CCyB2: Amount of institution-specific countercyclical capital buffer  | 17   |
| Annex XI: Leverage   |      |
| UK LR1: LRSum: Summary reconciliation of accounting assets and leverage ratio exposures                            | 18   |
| UK LR2: LRCom: Leverage ratio common disclosure  | 20   |
| UK LR3: LRSpl: Split-up of on balance sheet exposures (excluding derivatives, SFTs and exempted exposures)         | 22   |
| UK LRA: Disclosure of LR qualitative information   | 22   |
| Annex XV: Credit risk quality  |      |
| UK CQ1: Credit quality of forborne exposures   | 23   |
| UK CQ3: Credit quality of performing and non-performing exposures by past due days                                 | 24   |
| UK CQ4: Quality of non-performing exposures by geography   | 25   |
| UK CQ5: Credit quality of loans and advances by industry   | 26   |
| UK CR1: Performing and non-performing exposures and related provisions   | 27   |
| UK CR1-A: Maturity of exposures  | 28   |
| UK CR2: Changes in the stock of non-performing loans and advances  | 28   |
| UK CRB: Additional disclosure related to the credit quality of assets  | 28   |
| Annex XVII: Credit risk mitigation   |      |
| UK CR3: CRM techniques overview: Disclosure of the use of credit risk mitigation techniques                        | 31   |
| UK CRC: Qualitative disclosure requirements related to CRM techniques  | 32   |
| Annex XIX: Credit risk - standardised approach   |      |
| UK CR4: standardised approach – Credit risk exposure and CRM effects   | 33   |
| Annex XXI: Credit risk - IRB approach  |      |
| UK CR7: IRB approach – Effect on the RWAs of credit derivatives used as CRM techniques                             | 34   |
| UK CR7-A: IRB approach – Disclosure of the extent of the use of CRM techniques                                     | 35   |
| Annex XXIII: Specialised lending   |      |
| UK CR10: Specialised lending and equity exposures under the simple risk-weighted approach                          | 37   |
| Annex XXXIII: Remuneration   |      |
| UK REM A - Remuneration policy for all colleagues  | 38   |
| Remuneration of Material Risk Takers (MRTs) – National Westminster Bank Plc  | 41   |
| UK REM1 and UK REM5 - Total remuneration awarded to 'MRTs for the financial year                                   | 41   |
| UK REM2 - Guaranteed awards (including 'sign-on' awards) and severance payments                                    | 42   |
| UK REM3 - Outstanding deferred remuneration  | 43   |
| UK REM4 - Total remuneration by band for all colleagues earning >€1million   | 43   |

#### Attestation statement

We confirm that the 2022 Pillar 3 Report meets the relevant requirements for Pillar 3 disclosures and has been prepared in line with the internal control agreed by the NatWest Holding Group Board.

As set out in the Compliance report of the 2022 NatWest Group Annual Report and Accounts, the NatWest Group Board is responsible for the system of internal controls that is designed to maintain effective and efficient operations, compliant with applicable laws and regulations. The system of internal control is designed to manage risk or mitigate it to an acceptable residual level rather than eliminate it entirely. Systems of internal control can only provide reasonable and not absolute assurance against misstatement, fraud or loss.

The 2022 Pillar 3 Report was approved by the NatWest Holdings Group Board on 16 February 2023.

Katie Murray Group Chief Financial Officer Executive Director, NatWest Group Board Bruce Fletcher Group Chief Risk Officer Member, Executive Committee

#### Presentation of information

This document presents the Pillar 3 disclosures for National Westminster Bank Plc (NWB Plc) as at 31 December 2022. It should be read in conjunction with the 2022 NatWest Holdings Group Pillar 3 report and NWB Plc's 2022 Annual Report & Accounts (ARA), which are published in the same location at: investors.natwestgroup.com/reports-archive/2022

NWB Plc is incorporated in the United Kingdom and is a wholly-owned subsidiary of NatWest Holdings Limited ('NWH Ltd'). NatWest Group plc is 'the ultimate holding company'. The term 'NatWest Group' refers to NatWest Group plc and its subsidiary and associated undertakings.

Based on the criteria set out in the UK CRR, NatWest Group primarily defines its large subsidiaries in scope for PRA Pillar 3 disclosures as those designated as an Other Systemically Important Institution (O-SII) by the PRA or those with total assets equal to or greater than €30 billion.

NWB Plc, being a large, listed subsidiary of NatWest Group, is subject to a reduced number of disclosures as set out in the Level of Application chapter in the Disclosure (CRR) part of the PRA Rulebook. The required disclosures are as follows:

- Disclosure of own funds
- Disclosure of own funds requirements & risk weighted exposure amounts
- Disclosure of countercyclical capital buffers
- Disclosure of exposures to credit risk and dilution risk
- Disclosure of the use of credit risk mitigation techniques
- Disclosure of leverage ratio
- Disclosure of liquidity requirements
- Disclosure of renumeration policy

The disclosures for NWB Plc are calculated in accordance with the UK CRR (split across primary legislation and the PRA Rulebook) and completed in accordance with the Disclosure (CRR) part of the PRA rulebook.

The liquidity disclosures completed at UK Domestic Liquidity Subgroup (UK DoLSub) level are published in the NatWest Holdings Group Pillar 3 report. The UK DoLSub waiver allows NWB Plc, RBS plc and Coutts & Co to manage liquidity as a single sub-group rather than at an entity level.

Within this document, row and column references are based on those prescribed in the PRA templates. The IFRS9-FL and TLAC2 disclosures have been prepared using uniform format published by the EBA.

Certain fixed-format disclosure tables include bespoke requirements for comparatives. Where the requirements do not prescribe a particular comparative, the comparative selected is 31 December 2021. Where applicable, comparatives have not been provided for first-time disclosures.

A subset of the Pillar 3 templates that are required to be disclosed were not applicable to NWB Plc at 31 December 2022 and have therefore not been included in this report. Where appropriate, certain qualitative disclosures are provided in the NatWest Holdings Group Pillar 3 report. These excluded disclosures are listed below, together with a summary of the reason for their exclusion.

| PRA template |  |   |
|--------------|--|---|
| reference    | Template name  | Reasons for exclusion                       |
| UK CCR7      | RWA flow statements of CCR exposures under the IMM             | No reportable exposures                     |
| UK MR2-B     | RWA flow statements of market risk exposures under the IMA     | No reportable exposures                     |
| UK LIQ1      | Quantitative information on LCR                                | Refer to the liquidity and funding          |
| UK LIQB      | Qualitative information on LCR                                 | disclosures in the NatWest Holdings Group   |
| UK LIQ2      | Net Stable Funding Ratio                                       | Pillar 3 report                             |
| UK LIQA      | Liquidity risk management                                      | _   |
| UK CR2a      | Changes in the stock of non-performing loans and advances      | Threshold for disclosure not met            |
|              | and related net accumulated recoveries                         |   |
| UK CQ2       | Quality of forbearance   | Threshold for disclosure not met            |
| UK CQ6       | Collateral valuation - loans and advances                      | Threshold for disclosure not met            |
| UK CQ7       | Collateral obtained by taking possession and execution         | Collateral obtained by taking possession is |
|              | processes  | not recognised on the balance sheet         |
| UK CQ8       | Collateral obtained by taking possession and execution         | Collateral obtained by taking possession is |
|              | processes – vintage breakdown                                  | not recognised on the balance sheet &       |
|              |  | threshold not met                           |
| UK CR10.5    | Equity exposures under the simple risk-weighted approach       | No reportable exposures                     |
| UK CCA       | Main features of regulatory own funds instruments and eligible | Published as supplement alongside this      |
|              | liabilities instruments  | report                                      |

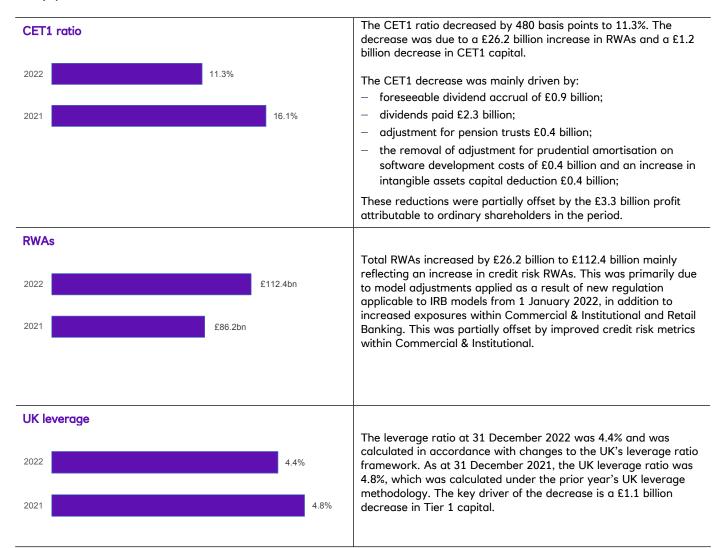

In this report, in line with the regulatory framework, the term credit risk excludes counterparty credit risk, unless specifically indicated otherwise.

The Pillar 3 disclosures in this report are presented in pounds sterling ('£') and have not been subject to external audit.

For definitions of terms, refer to the Glossary available on natwestgroup.com.

## Annex I: Key metrics and overview of risk weighted assets

#### Key points

#### IFRS 9-FL: Comparison of institutions' own funds and capital and leverage ratios with and without the application of transitional arrangements for IFRS 9 or analogous ECL

The table below shows key prudential regulation ratios and measures with and without the application of IFRS 9 transitional relief. NWB Plc has elected to take advantage of the transitional capital rules in respect of ECL provisions. Following the adoption of IFRS 9 from 1 January 2018, the CRR introduced transitional rules to phase in the full CET1 effect over a five-year period. The revised transitional amendments will maintain a CET1 add-back of relevant ECL provisions until 31 December 2024. Capital measures in this table are presented in line with table UK KM1.

|      |  | NWB Plc             |                      |                 |                  |                     |  |

| 15   | Leverage ratio exposure measure (£m)                           | 341,308             | 343,343              | 340,086         | 338,123          | 426,681             |  |
| 16   | Leverage ratio (%)   | 4.4                 | 4.3                  | 4.3             | 4.7              | 3.8                 |  |
| 17   | Leverage ratio (%) as if IFRS 9 transitional arrangements had  |                     |                      |                 |                  |                     |  |
|      | not been applied   | 4.3                 | 4.2                  | 4.2             | 4.6              | 3.7                 |  |

<sup>(1)</sup> The requirement to complete this table until the end of transitional period is based on EBA guidelines (EBA/GL/2018/01) and has been on shored in the UK disclosure framework via a joint Statement of Policy by the Bank of England and the PRA
From 1 January 2022, the leverage metrics for NWB Plc are calculated in accordance with the Leverage Ratio (CRR) part of the PRA Rulebook.

#### UK KM1: Key metrics template

The table below provides a summary of the main prudential regulation ratios and measures. Capital ratios and measures are presented on a transitional basis, and therefore include permissible adjustments for the remaining IFRS 9 relief. NWB Plc has elected to take advantage of the IFRS 9 transitional capital rules in respect of ECL provisions. The revised transitional amendments will maintain a CET1 add-back of relevant ECL provisions until 31 December 2024.

<sup>(1)</sup> The amount is shown for information only, as these exposures are already included in rows 1 and 2.

#### **UK OVC: ICAAP information**

An internal assessment of material risks is carried out annually to enable an evaluation of the amount, type and distribution of capital required to cover these risks. This is referred to as the Internal Capital Adequacy Assessment Process (ICAAP). The ICAAP consists of a point-in-time assessment of exposures and risks at the end of the financial year together with a forward-looking stress capital assessment. The ICAAP is approved by the Board and submitted to the PRA.

#### UK CR8: RWA flow statements of credit risk exposures under the IRB approach

The table below shows movements in RWAs for credit risk exposures under the internal ratings based (IRB) approach. It excludes counterparty credit risk, securitisations and non-credit obligation assets.

|   |                            | NWB Plc |

| 7 | Foreign exchange movements | 435     |
| 9 | At 30 September 2022       | 78,503  |
| 2 | Asset size                 | 4,025   |
| 3 | Asset quality              | (501)   |
| 4 | Model updates              | 1,255   |
| 7 | Foreign exchange movements | (277)   |
| 9 | At 31 December 2022        | 83,005  |

<sup>(1)</sup> The following row is not presented in the table because it had zero values for the period: row (6) Acquisitions and disposals.

#### Q4 2022

- The uplift in asset size primarily relates to increases in Commercial & Institutional as a result of drawdowns and new facilities. Further uplifts were mainly due to increased exposures in Retail Banking.
- The increase in model updates was primarily due to adjustments as a result of new regulations applicable to IRB models from 1 January 2022.
- The reduction in RWAs related to asset quality primarily relates to customers moving into default and improved risk metrics within Commercial & Institutional. Further decreases are due to improved risk metrics within Commercial & Institutional, partially offset by a deterioration in risk metrics in Retail Banking in the period.
- The decrease in foreign exchange movements was mainly a result of sterling strengthening against the US dollar and euro during the period.

### Annex VII: Capital

#### UK CC1: Composition of regulatory own funds

The table below shows the capital resources on a transitional basis. Regulatory adjustments comprise deductions from own funds and prudential filters. The table also includes a cross reference to the corresponding rows in template UK CC2 to facilitate full reconciliation of accounting and regulatory own funds

**NWB Plc** 

<sup>(1)</sup> Row 68: represents the CET1 ratio less CET1 currently used to meet SREP requirements (Pillar 1 & 2A).

<sup>(2)</sup> The references (a) to (k) identify balance sheet components in table UK CC2 that are used in the calculation of regulatory capital in table UK CC1. Amounts between UK CC2 and UK CC1 are not always directly comparable due to differences in definitions and application of Capital Requirements Directive for the calculation of regulatory capital.

<sup>(3)</sup> The following lines are not presented as they are not applicable under the UK disclosure requirements: 9, 20, 24, 26, 41, 54a, 56, 69, 70, 71 and 74.

### UK CC2: reconciliation of regulatory own funds to balance sheet in the audited financial statements

The table below shows the reconciliation between the accounting and regulatory consolidation with references showing the linkage between this table and UK CC1.

### Annex IX: Countercyclical capital buffers

UK CCyB1: Geographical distribution of credit exposures relevant for the calculation of the countercyclical buffer

As part of the banking reforms introduced by Basel III, a countercyclical capital buffer is required to ensure banks take account of the macro-financial environment when assessing adequate capital requirements. The buffer is to help protect banks during periods of excess aggregate credit growth that have often been associated with the build-up of system-wide risk. This regime is intended to help reduce the risk that the supply of credit will be constrained during a period of economic downturn, which in turn could undermine the performance of the real economy and consequently result in additional credit losses in the banking system.

The table below summarises NWB Plc's total exposures and own funds requirements based on country of economic operation of the customer. Where applicable, a countercyclical capital buffer rate is applied to the own funds requirement for the geographic region to capture an additional countercyclical requirement.

General credit and trading book exposures exclude those with central governments/banks, regional governments, local authorities, public sector entities, multilateral development banks, international organisations and institutions. The exposures below therefore differ from those presented in the credit and counterparty credit risk sections.

#### UK CCyB2: Amount of institution-specific countercyclical capital buffer

|   |   | NWB Plc     |
|---|---|-------------|
|   |   | 31 December |
|   |   | 2022        |
|   |   | £m          |
| 1 | Total risk exposure amount  | 112,428     |
| 2 | Institution specific countercyclical capital buffer                 | 0.89%       |
| 3 | Institution specific countercyclical capital buffer requirement (1) | 1,005       |

<sup>(1)</sup> The Financial Policy Committee increased the UK CCyB rate from 0% to 1% effective from 13 December 2022. A further increase from 1% to 2% was announced on 5 July 2022, effective 5 July 2023. In June 2022, the Central Bank of Ireland announced that the CCyB on Irish exposures will increase from 0% to 0.5%, applicable from 15 June 2023. This is the first step towards a gradual increase, which conditional on macro-financial developments, would see a CCyB of 1.5% announced by mid-2023.

### Annex XI: Leverage

#### UK LR1 - LRSum: Summary reconciliation of accounting assets and leverage ratio exposures

The table below shows a reconciliation between total assets under IFRS standards and the leverage exposure measure. The leverage metrics are calculated in accordance with the Leverage Ratio (CRR) part of the PRA Rulebook.

| UK-12 | Other exposures (e.g. equity, securitisations, and non-credit obligation assets)                  | 6,003       | 8,236   |

### UK LRA: Disclosure of LR qualitative information Processes used to manage the risk of excessive leverage

The Group actively manages the risk of excessive leverage through relevant Board approved Risk Appetite measures, operational limits, targets, and recovery indicators. This ensures that the Group and its entities are sufficiently capitalised to meet supervisory leverage requirements in normal business conditions and appropriate requirements for leverage under stress events. The Group embeds its strong focus on leverage in its capital planning, capital allocation, and transfer pricing processes, incentivising businesses to make appropriate decisions with regards to leverage exposure within their portfolios. The Group regularly monitors leverage targets, exposure, and capacity, on an actual and forecast basis, in relevant Governance committees.

### Factors that had an impact on the leverage ratio during the period to which the disclosed leverage ratio refers

The leverage ratio as at 31 December 2022 is 4.4%, calculated in accordance with current requirements in the Leverage Ratio (CRR) part of the PRA rulebook. The ratio increased by 10 basis points in the period since 30 June 2022. The key driver is a £0.4 billion increase in Tier 1 capital offset by a £1.2 billion increase in leverage exposure predominantly due to increased off balance sheet exposures.

### Annex XV: Credit risk quality

#### UK CQ1: Credit quality of forborne exposures

The table below shows gross carrying amount of forborne exposures and the related accumulated impairment, provisions, accumulated change in fair value due to credit risk and collateral and financial guarantees received by portfolio and exposure class.

#### UK CR2: Changes in the stock of non-performing loans and advances

The table below shows movements of gross carrying amounts of non-performing loans and advances during the period.

|                     |  | NWB Plc  |
|---------------------|--|----------|
|                     |  | а        |
|                     |  | Gross    |
|                     |  | carrying |
|                     |  | amount   |
|                     |  | £m       |
| <sub>010</sub> Init | ial stock of non-performing loans and advances | 2,927    |
| <sub>020</sub> Inf  | lows to non-performing portfolios              | 2,874    |
| <sub>030</sub> Ou   | tflows from non-performing portfolios          | (2,252)  |
| <sub>040</sub> Ou   | tflows due to write-offs                       | (276)    |
| <sub>050</sub> Ou   | tflow due to other situations                  | (1,976)  |
| <sub>060</sub> Fin  | al stock of non-performing loans and advances  | 3,549    |

Outflow due to other situations in the table above primarily includes outflow due to loan repayment & transfer to performing portfolio. Exposures classified as held-for-trading are excluded from the table in accordance with FINREP definitions.

### UK CRB: Additional disclosure related to the credit quality of assets

All credit grades map to an asset quality (AQ) scale, used for financial reporting. This AQ scale is based on Basel probability of defaults. Performing loans are defined as AQ1-AQ9 (where the probability of default (PD) is less than 100%) and defaulted non-performing loans as AQ10 or Stage 3 under IFRS 9 (where the PD is 100%). Loans are defined as defaulted when the payment status becomes 90 days past due, or earlier if there is clear evidence that the borrower is unlikely to repay, for example bankruptcy or insolvency.

As of January 2022, a new regulatory definition of default for was introduced in line with PRA and EBA guidance. This definition of default was also adopted for IFRS 9.

#### Impairment, provisioning and write-offs

In the overall assessment of credit risk, impairment provisioning and write-offs are used as key indicators of credit quality. NWB Plc's IFRS 9 provisioning models, which use existing Basel models as a starting point, incorporate term structures and forward-looking information. Regulatory conservatism within the Basel models has been removed as appropriate to comply with the IFRS 9 requirement for unbiased ECL estimates.

Five key areas may materially influence the measurement of credit impairment under IFRS 9 – two of these relate to model build and three relate to model application:

#### Model build:

- The determination of economic indicators that have most influence on credit loss for each portfolio and the severity of impact (this leverages existing stress testing models which are reviewed annually).
- The build of term structures to extend the determination of the risk of loss beyond 12 months that will influence the impact of lifetime loss for exposures in Stage 2.

#### Model application:

- The assessment of the SICR and the formation of a framework capable of consistent application.
- The determination of asset lifetimes that reflect behavioural characteristics while also representing management actions and processes (using historical data and experience).
- The choice of forward-looking economic scenarios and their respective probability weights.

#### IFRS 9 ECL model design principles

Modelling of ECL for IFRS 9 follows the conventional approach to divide the estimation of credit losses into its component parts of PD, LGD and EAD.

To meet IFRS 9 requirements, the PD, LGD and EAD parameters differ from their Pillar 1 internal ratings based counterparts in the following aspects:

- Unbiased material regulatory conservatism has been removed from IFRS 9 parameters to produce unbiased estimates
- Point-in-time IFRS 9 parameters reflect actual economic conditions at the reporting date instead of long-run average or downturn conditions.
- Forward-looking IFRS 9 PD estimates and, where appropriate, EAD and LGD estimates reflect forward-looking economic conditions.

Lifetime measurement – IFRS 9 PD, LGD and EAD are provided as multi-period term structures up to exposure lifetimes instead of over a fixed one-year horizon.

IFRS 9 requires that at each reporting date, an entity shall assess whether the credit risk on an account has increased significantly since initial recognition. Part of this assessment requires a comparison to be made between the current lifetime PD (i.e. the PD over the remaining lifetime at the reporting date) and the equivalent lifetime PD as determined at the date of initial recognition. For assets originated before IFRS 9 was introduced, comparable lifetime origination PDs did not exist. These have been retrospectively created using the relevant model inputs applicable at initial recognition.

#### PD estimates

#### Personal models

Personal PD models follow a discrete multi-horizon survival approach, predicting quarterly PDs up to lifetime using account level and forward-looking economic information, with the key driver at account level being scores from related internal ratings based PD models. The current suite of PD models was introduced in 2022 replacing the previous, first-generation suite, based on the Exogenous, Maturity and Vintage (EMV) approach.

#### Wholesale models

Wholesale PD models use a point-in-time/through-the-cycle framework to convert one-year regulatory PDs into point-intime estimates that reflect economic conditions at the reporting date. The framework utilises credit cycle indices (CCIs) for a comprehensive set of region/industry segments. One year point-in-time PDs are extended to forward-looking lifetime PDs using a conditional transition matrix approach and a set of econometric forecasting models.

#### **LGD** estimates

The general approach for the IFRS 9 LGD models is to leverage corresponding Basel LGD models with bespoke adjustments to ensure estimates are unbiased and, where relevant, forward-looking.

#### Personal

Forward-looking information has only been incorporated for the secured portfolios, where changes in property prices can be readily accommodated. Analysis has shown minimal impact of economic conditions on LGDs for the other Personal portfolios.

#### Wholesale

Forward-looking economic information is incorporated into LGD estimates using the existing CCI framework. For low default portfolios, including sovereigns and banks, loss data is too scarce to substantiate estimates that vary with economic conditions. Consequently, for these portfolios, LGD estimates are assumed to be constant throughout the projection horizon.

#### **EAD** estimates

#### Personal

The IFRS 9 Personal modelling approach for EAD is dependent on product type.

- Revolving products use the existing Basel models as a basis, with appropriate adjustments incorporating a term structure based on time to default.
- Amortising products use an amortising schedule, where a formula is used to calculate the expected balance based on remaining terms and interest rates.

Analysis has indicated that there is minimal impact on EAD arising from changes in the economy for all Personal portfolios except mortgages. Therefore, forward-looking information is only incorporated in the mortgage EAD model (through forecast changes in interest rates).

#### Wholesale

For Wholesale, EAD values are projected using product specific credit conversion factors (CCFs), closely following the product segmentation and approach of the respective Basel model. However, the CCFs are estimated over multi-year time horizons and contain no regulatory conservatism or downturn assumptions.

No explicit forward-looking information is incorporated, on the basis of analysis showing the temporal variation in CCFs is mainly attributable to changes in exposure management practices rather than economic conditions.

#### Governance and post model adjustments

The IFRS 9 PD, EAD and LGD models are subject to NWB Plc's model risk policy that stipulates periodic model monitoring, periodic re-validation and defines approval procedures and authorities according to model materiality. Various post model adjustments were applied where management judged they were necessary to ensure an adequate level of overall ECL provision. All post model adjustments were subject to formal approval through provisioning governance, and were categorised as follows (business level commentary is provided below):

- Deferred model calibrations ECL adjustments where PD model monitoring indicated that actual defaults were below estimated levels but where it was judged that an implied ECL release was not supportable due to the influence of government support schemes on default levels in the past two years. As a consequence, any potential ECL release was deferred and retained on the balance sheet until modelled ECL levels are affirmed by new model parallel runs or similar analyses.
- Economic uncertainty ECL adjustments primarily arising from uncertainties associated with increased inflation and cost of living risks as well as supply chain disruption, along with the residual effect of COVID-19 and government support schemes. In all cases, management judged that additional ECL was required until further credit performance data became available as the full effects of these issues matures.
- Other adjustments ECL adjustments where it was judged that the modelled ECL required to be amended.

Post-model adjustments will remain a key focus area of NWB Plc's ongoing ECL adequacy assessment process. A holistic framework has been established including reviewing a range of economic data, external benchmark information and portfolio performance trends with a particular focus on segments of the portfolio (both commercial and consumer) that are likely to be more susceptible to inflation, cost of living and supply chain risks.

#### Significant increase in credit risk (SICR)

Exposures that are considered significantly credit deteriorated since initial recognition are classified in Stage 2 and assessed for lifetime ECL measurement (exposures not considered deteriorated carry a 12 month ECL). NWB Plc has adopted a framework to identify deterioration based primarily on relative movements in lifetime PD supported by additional qualitative backstops. The principles applied are consistent across NWB Plc and align to credit risk management practices, where appropriate.

The framework comprises the following elements:

- IFRS 9 lifetime PD assessment (the primary driver) on modelled portfolios, the assessment is based on the relative deterioration in forward-looking lifetime PD and is assessed monthly. To assess whether credit deterioration has occurred, the residual lifetime PD at balance sheet date (which PD is established at date of initial recognition (DOIR)) is compared to the current PD. If the current lifetime PD exceeds the residual origination PD by more than a threshold amount, deterioration is assumed to have occurred and the exposure transferred into Stage 2 for a lifetime loss assessment. For Wholesale, a doubling of PD would indicate a SICR subject to a minimum PD uplift of 0.1%. For Personal portfolios, the criteria vary by risk band, with lower risk exposures needing to deteriorate more than higher risk exposures.
- Qualitative high-risk backstops the PD assessment is complemented with the use of qualitative high-risk backstops to further inform whether significant deterioration in lifetime risk of default has occurred. The qualitative high-risk backstop assessment includes the use of the mandatory 30+ days past due backstop, as prescribed by IFRS 9 guidance, and other features such as forbearance support, Wholesale exposures managed within the Risk of Credit Loss framework, and adverse credit bureau results for Personal customers.
- Persistence (Personal and business banking customers only)
   the persistence rule ensures that accounts which have met the criteria for PD driven deterioration are still considered to be significantly deteriorated for three months thereafter.
   This additional rule enhances the timeliness of capture in Stage 2. The persistence rule is applied to PD driven deterioration only.

The criteria are based on a significant amount of empirical analysis and seek to meet three key objectives:

- Criteria effectiveness the criteria should be effective in identifying significant credit deterioration and prospective default population.
- Stage 2 stability the criteria should not introduce unnecessary volatility in the Stage 2 population.
- Portfolio analysis the criteria should produce results which are intuitive when reported as part of the wider credit portfolio

### Annex XVII: Credit risk mitigation

UK CR3: CRM techniques overview: Disclosure of the use of credit risk mitigation techniques

The table below shows net carrying values of credit risk exposures analysed by use of different credit risk mitigation techniques as recognised under the applicable accounting framework regardless of whether these techniques are recognised under CRR. Counterparty credit risk exposures are excluded.

|      |                                    |           |          | NWB Plc    |            |             |
|------|------------------------------------|-----------|----------|------------|------------|-------------|

<sup>(1)</sup> Exposures classified as held-for-trading are excluded from the table in accordance with FINREP definitions and Basel disclosure requirements.

#### UK CRC: Qualitative disclosure Requirements related to CRM techniques Credit risk mitigation

Credit risk mitigation (CRM) is defined as the use of collateral or guarantees to reduce potential loss if a customer fails to settle all or part of its obligations to NWB Plc. The application of CRM depends on which approach (standardised or IRB) is used to calculate RWAs related to a credit exposure.

Recognition of CRM under the standardised approach is carried out in accordance with regulatory requirements and entails the reduction of EAD (netting and financial collateral) or the adjustment of risk-weights (in the case of real estate), third-party guarantees and/or credit derivatives. Under the IRB approach, a wider scope of collateral can be recognised.

NWB Plc uses a number of credit risk mitigation approaches. These differ for Wholesale and Personal customers.

Mitigation techniques, as set out in the appropriate credit policies and transactional acceptance standards, are used in the management of credit portfolios across NWB Plc. These techniques mitigate credit concentrations in relation to an individual customer, a borrower group or a collection of related borrowers. Where possible, customer credit balances are netted against obligations. Mitigation tools can include structuring a security interest in a physical or financial asset, the use of credit derivatives including credit default swaps, credit-linked debt instruments and securitisation structures, and the use of guarantees and similar instruments (for example, credit insurance) from related and third parties. When seeking to mitigate risk, at a minimum NWB Plc considers the following:

- Suitability of the proposed risk mitigation, particularly if restrictions apply.
- The means by which legal certainty is to be established, including required documentation, supportive legal opinions and the steps needed to establish legal rights.
- Acceptability of the methodologies to be used for initial and subsequent valuation of collateral, the frequency of valuations
- Actions which can be taken if the value of collateral or other mitigants is less than needed.
- The risk that the value of mitigants and counterparty credit quality will deteriorate simultaneously.
- The need to manage concentration risks arising from collateral types.
- The need to ensure that any risk mitigation remains legally effective and enforceable.

The business and credit teams are supported by specialist inhouse documentation teams. NWB Plc uses industry-standard loan and security documentation wherever possible. However, when non-standard documentation is used, external lawyers are employed to review the documentation on a case-by-case basis. Mitigants (including any associated insurance) are monitored throughout the life of the transaction to ensure they perform as anticipated. Similarly, documentation is also monitored to ensure it remains enforceable.

#### Wholesale

NWB Plc mitigates credit risk relating to Wholesale customers through the use of netting, collateral and market standard documentation, depending on the nature of the counterparty and its assets. The most common types of mitigation are:

- Commercial real estate.
- Other physical assets Including stock, plant, equipment, machinery, vehicles, ships and aircraft. Such assets are suitable collateral only if NWB Plc can identify, locate, and segregate them from other assets on which it does not have a claim. NWB Plc values physical assets in a variety of ways, depending on the type of asset and may rely on balance sheet valuations in certain cases.
- Receivables These are amounts owed to NWB Plc's counterparties by their own customers. Valuation takes into account the quality of the counterparty's receivable management processes and excludes any that are past due.

All collateral is assessed, case by case, independently of the provider to ensure that it is suitable security for the proposed loan. NWB Plc monitors the value of the collateral and, if there is a shortfall, will review the position, which may lead to seeking additional collateral.

Property is used to mitigate credit risk across a number of portfolios, in particular commercial real estate (CRE).

For CRE valuations, NWB Plc has an actively managed panel of chartered surveying firms that cover the spectrum of geography and property sectors in which NWB Plc takes collateral. Suitable Royal Institution of Chartered Surveyors (RICS) registered valuers for particular assets are typically contracted through a service agreement to ensure consistency of quality and advice. valuations are generally commissioned when an asset is taken as security; a material increase in a facility is requested; or a default event is anticipated or has occurred. In the UK, an independent third-party market indexation is applied to update external valuations once they are more than a year old and every three years, a formal independent valuation review is commissioned.

#### Personal

NWB Plc takes collateral in the form of residential property to mitigate the credit risk arising from mortgages. NWB Plc values residential property individually during the loan underwriting process, either by obtaining an appraisal by a suitably qualified appraiser (for example, RICS) or using a statistically valid model. In both cases, a sample of the valuation outputs are periodically reviewed by an independent RICS qualified appraiser. NWB Plc updates residential property values quarterly using country (Scotland, Wales and Northern Ireland) or English regional specific Office for National Statistics House Price indices

### Annex XIX: Credit risk – standardised approach

#### UK CR4: Standardised approach – credit risk exposure and CRM effects

The table below shows the effect of CRM techniques on credit risk exposures under the standardised approach. It shows exposures both pre and post CRM and CCFs as well as associated RWAs and RWA density, split by exposure class. It excludes counterparty credit risk and securitisations.

|    |   | NWB Plc    |             |            |             |          |         |  |  |  |  |

### Annex XXIII: Specialised lending

UK CR10: Specialised lending and equity exposures under the simple risk-weighted approach

The table below shows specialised lending exposures subject to the supervisory slotting approach analysed by type of lending and regulatory category. NWB Plc does not have Object Finance, Commodities Finance and Equity exposures; therefore, those are not presented separately. Exposures subject to the Securitisations framework are excluded.

#### Annex XXXIII: Remuneration

This section contains disclosures which are required in accordance with UK regulatory requirements and the Basel Committee on Banking Supervision Pillar 3 disclosure requirements. They also take into account the European Banking Authority (EBA) guidelines on sound remuneration policies. It should be read in conjunction with the Directors' Remuneration Report starting on page 138 of the NatWest Group 2022 ARA.

### UK REM A - Remuneration policy for all colleagues

The remuneration policy supports the business strategy and is designed to promote the long-term success of NatWest Group. It aims to reward the delivery of good performance provided this is achieved in a manner consistent with NatWest Group values and within acceptable risk parameters.

The remuneration policy applies the same principles to everyone, including Material Risk Takers (MRTs), with some minor adjustments where necessary to comply with local regulatory requirements. The main elements of the policy are set out below.

#### Base salary

The purpose is to provide a competitive level of fixed cash remuneration.

#### Operation

We review base salaries annually to ensure they reflect the talents, skills and competencies the individual brings to the business

#### Role-based allowance

Certain MRT roles receive role-based allowances. The purpose is to provide fixed pay that reflects the skills and experience required for the role.

#### Operation

Role-based allowances are fixed allowances which form an element of overall fixed remuneration for regulatory purposes. They are based on the role the individual performs.

They are delivered in cash and/or shares depending on the level of the allowance and the seniority of the recipient. Shares are subject to a minimum three-year retention period.

#### Benefits and pension

The purpose is to provide a range of flexible and competitive benefits.

#### Operation

In most jurisdictions, benefits or a cash equivalent are provided from a flexible benefits account. Pension funding forms part of fixed remuneration and NatWest Group does not provide discretionary pension benefits.

#### Annual bonus

The purpose is to support a culture where individuals recognise the importance of helping people, families and businesses to thrive and are rewarded for superior performance. Certain junior roles are not eligible for an annual bonus. Annual bonus is offered to our more senior colleagues, including MRTs, the executive directors and members and attendees of NatWest Group's senior executive committees, as it is appropriate for them to have some variable pay at risk if performance is not at the required level.

#### Operation

The annual bonus pool is based on a balanced scorecard of measures including financial, customer, people and culture, climate, financial capability, enterprise and risk and control measures. Allocation from the pool depends on the performance of the business area and the individual.

We use a structured performance management framework to support individual performance assessment. This is designed to assess performance against longer-term business requirements across a range of financial and non-financial metrics. It also evaluates adherence to internal controls and risk management. We use a balanced scorecard to align with the business strategy. Each individual will have defined measures of success for their role.

We also take risk and conduct performance into account. Control functions are assessed independently of the business units that they oversee. Performance goals and remuneration are set according to the priorities of the control area, not the targets of the businesses they support. The Group Chief Risk Officer and the Group Chief Audit Executive have the authority to escalate matters to Board level if management do not respond appropriately.

Independent control functions exist for the main legal entities outside the ring fence (NWM Plc and RBS International). Multiple reporting lines are in place into the respective legal entity CEOs and the NatWest Group Control Function Head.

Awards may be granted up to a maximum of 100% of fixed pay. For awards made in respect of the 2022 performance year, immediate cash awards continue to be limited to a maximum of £2,000. In line with regulatory requirements, for MRTs, 40% of awards under £500,000 will be deferred over four, five or seven years. This rises to 60% for awards over £500,000, and awards granted to the directors of significant UK firms. For MRTs, a minimum of 50% of any variable pay is delivered in shares and a 12-month retention period applies to the shares after vesting.

The deferral period is four years for standard MRTs and Risk Manager MRTs who meet the 'non-higher paid' condition. It rises to five years for 'higher paid' Risk Manager MRTs, FCA Senior Management Functions (SMF), and PRA SMFs who meet the 'non-higher paid' condition; and to seven years for 'higher paid' PRA SMF roles. All awards are subject to malus and clawback provisions.

Guaranteed awards may only be granted for new hires in exceptional circumstances in compensation for awards forgone at their previous company and are limited to first year of service. NatWest Group does not offer sign-on awards. Retention awards are only used in truly exceptional circumstances such as major restructuring and where the individual is a 'flight risk' and is viewed as critical to the successful operation of the business or delivery of a business critical project. Whilst no performance conditions are attached to retention awards, the colleague must continue to deliver to the standard expectations of conduct, behaviour and minimum performance levels prior to the award vesting.

Severance payments and/or arrangements can be made to colleagues who leave NatWest Group in certain situations, including redundancy. Such payments are calculated by a predetermined formula set out within the relevant social plans, policies, agreements or local laws. Where local laws permit, there is a cap on the maximum amount that can be paid.

# UK REM A - Remuneration policy for all colleagues continued Restricted Share Plan (RSP) awards

The purpose and operation of RSP awards is explained in detail in the Directors' Remuneration Report. NatWest Group provides executive directors and certain members of NatWest Group's senior executive committees with RSP awards which are delivered entirely in shares. Any awards made are subject to a performance assessment prior to grant and a further assessment against underpin criteria prior to vesting.

#### Shareholding requirements

The requirements promote long-term alignment between senior executives and shareholders.

#### Operation

Executive directors and certain members of NatWest Group's senior executive committees are required to build up and hold a shareholding equivalent to a percentage of salary. There is a restriction on the number of shares that individuals can sell until this requirement is met.

#### Company share plans

The purpose is to provide an easy way for individuals to hold shares in NatWest Group plc, which helps to encourage financial capability and long-term thinking and provides a direct involvement in NatWest Group's performance.

#### Operation

Colleagues in certain jurisdictions are offered the opportunity to contribute from salary and acquire shares in NatWest Group plc through company share plans. This includes Sharesave and the Buy As You Earn plan in the UK. Any shares held are not subject to performance conditions.

#### Criteria for identifying MRTs

The EBA has issued criteria for identifying MRT roles, which includes those staff whose activities have a material influence over NatWest Group's performance or risk profile. These criteria are both qualitative (based on the nature of the role) and quantitative (based on the amount a colleague is paid). In 2022, MRTs were identified for 13 legal entities (including at parent, holding company and consolidated levels) within NatWest Group. The MRT criteria are applied for each of these entities, and consequently many MRTs are identified in relation to more than one entity.

The qualitative criteria can be summarised as: staff within the management body; senior management; other staff with key functional or managerial responsibilities including for risk management; and staff who individually, or as part of a Committee, have authority to approve new business products or to commit to credit risk exposures and market risk transactions above certain levels.

The quantitative criteria are: individuals earning £660,000 or more in the previous year; individuals earning less than £660,000 in the previous year, but more than a threshold set at the higher of £440,000 or the average total earnings of the management body and senior management for the relevant legal entity and who can impact the risk profile of a material business unit; and individuals in the top 0.3% of earners of the relevant legal entity for the previous year. In addition to the qualitative and quantitative criteria, NatWest Group has applied its own minimum standards to identify roles that are considered to have a material influence over its risk profile.

#### Personal hedging strategies

The conditions attached to discretionary share-based awards prohibit the use of any personal hedging strategies to lessen the impact of a reduction in the value of such awards. Recipients explicitly acknowledge and accept these conditions when any share-based awards are granted.

#### Risk in the remuneration process

NatWest Group's approach to remuneration promotes effective risk management through having a clear distinction between fixed remuneration (which reflects the role undertaken by an individual) and variable remuneration (which is directly linked to performance and can be risk-adjusted). Fixed pay is set at an appropriate level to discourage excessive risk-taking and which would allow NatWest Group to pay zero variable pay.

We achieve focus on risk through clear inclusion of risk in performance goals, performance reviews, the determination of variable pay pools, incentive plan design and the application of malus and clawback. The Remuneration Committee (RemCo) is supported in this by the Board Risk Committee (BRC) and the Risk function, as well as independent oversight by the Internal Audit function.

We use a robust process to assess risk performance. We consider a range of measures, specifically: capital; liquidity and funding risk; credit risk; market risk; pension risk; compliance & conduct risk; financial crime; climate risk; operational risk; business risk and reputational risk. We also consider our overall risk culture.

Remuneration arrangements are in line with regulatory requirements and we fully disclose and discuss the steps taken to ensure appropriate and thorough risk adjustment with the PRA and the FCA.

#### Variable pay determination

For the 2022 performance year, NatWest Group operated a robust control function-led multi-step process to assess performance and determine the appropriate bonus pool by business area and function. At multiple points throughout the process, we made reference to Group-wide business performance (from both affordability and appropriateness perspectives) and the need to distinguish between 'go-forward' and 'resolution' activities.

The process uses financial, customer, people and culture, climate, financial capability and enterprise measures to consider a balanced scorecard of performance assessments at the level of each business area or function. We then undertake risk and control assessments at the same level to ensure performance achieved without appropriate consideration of risk, risk culture and conduct controls, is not inappropriately rewarded.

BRC reviews any material risk and conduct events and, if appropriate, an underpin may be applied to the individual business and function bonus pools or to the overall bonus pool. BRC may recommend a reduction of a bonus pool if it considers that risk and conduct performance is unacceptable or that the impact of poor risk management has yet to be fully reflected in the respective inputs.

Following further review against overall performance and conduct, taking into account input from the CFO on affordability and capital and liquidity adequacy, the CEO will make a final recommendation to the RemCo, informed by all the previous steps and her strategic view of the business. The RemCo will then make an independent decision on the final bonus pool taking all of these earlier steps into account.

### UK REM A - Remuneration policy for all colleagues continued

#### Variable pay determination continued

The assessment process for RSP awards to executive directors and other eligible senior executives uses our internal ratings scale to determine whether satisfactory performance has been delivered in the year prior to grant. A further assessment of performance against underpin criteria including risk considerations takes place before vesting.

#### Remuneration and culture

NatWest Group continues to assess conduct and its impact on remuneration as part of the annual Group-wide bonus pool process and also via the accountability review framework. Many colleagues receive fixed pay only, which provides them with greater security and allows them to fully focus on the needs of the customer. The RemCo will continue to review workforce remuneration and the alignment of incentives and reward with culture.

The governance of culture is clearly laid out. Senior management function roles have clearly defined accountabilities which are taken into account in their performance and pay decisions. The Board and Sustainable Banking Committee also play essential roles in building cultural priorities. Frameworks are in place to measure progress.

### Accountability review process and malus/clawback

We introduced the accountability review process in 2012 to identify any material risk management, control and general policy breach failures, or employee misbehaviour and to ensure accountability for those events. This allows NatWest Group to respond to instances where new information would change the variable pay decisions made in previous years and/or the decisions to be made in the current year. Potential outcomes under the accountability review process are:

- malus to reduce (to zero if appropriate) the amount of any unvested variable pay awards prior to payment;
- clawback to recover awards that have already vested; and
- in-year bonus reductions to adjust variable pay that would have otherwise been awarded for the current year.

As part of the acceptance of variable pay awards, colleagues must agree to terms that state that malus and clawback may be applied. Any variable pay awarded to MRTs is subject to clawback for seven years from the date of grant. This period can be extended to 10 years for MRTs who perform a 'senior management function' under the Senior Managers Regime where there are outstanding internal or regulatory investigations at the end of the normal seven-year clawback period. Awards to other colleagues (non-MRTs) are subject to clawback for 12 months from each vesting date.

During 2022 a number of issues and events were considered under the accountability review framework. The outcomes covered a range of actions including reduction (to zero where appropriate) of unvested awards through malus, in-year bonus reduction and the suspension of awards pending further investigation.

#### Remuneration of Material Risk Takers ('MRTs') – National Westminster Bank Plc

The quantitative disclosures below are made in accordance with regulatory requirements in relation to 320 individuals who have been identified as MRTs for National Westminster Bank Plc (NWB).

We have excluded 37 individuals from the tables below on the basis that, although they have been identified as an MRT in relation to a role within a subsidiary entity, they do not receive any remuneration for this role and they perform their primary role for another entity within NatWest Group. You can find details of remuneration paid to MRTs in our Pillar 3 reporting for other entities within NatWest Group, at a consolidated, sub-consolidated and solo entity level, at natwestgroup.com. Note the numbers in the tables all agree to the underlying source data, but when presented to two decimal places and aggregated, this can result in small rounding differences.

Following the publication of the updated EBA Guidelines on Remuneration Benchmarking in June 2022, in order to ensure consistency across remuneration disclosures, there has been a change of approach to our reporting of the number of MRTs and their variable pay, reflected in the tables below. The total number of MRTs now excludes colleagues who left the Group prior to year end (but their remuneration remains within the pay values reported); and all severance payments made to MRTs are now included in the variable remuneration value disclosed, even when some or all of that severance does not count towards the calculation of the ratio of fixed to variable pay.

Performance and Remuneration matters for NWB are overseen by the NatWest Holdings Performance & Remuneration Committee (NWH RemCo), which is a committee of the Boards of NatWest Holdings Limited, The Royal Bank of Scotland plc and NWB (collectively, the NWH Sub Group). The NWH RemCo is expected to ensure that the remuneration policies, procedures and practices being applied are appropriate for NWB and the other entities within the NWH Sub Group. The key areas of focus for the NWH RemCo includes:

- reviewing and recommending, or where appropriate ratifying, remuneration arrangements for key employees;
- providing input on the proposed bonus pool for relevant entities, and ensuring such proposals are adjusted for performance and risk and meet capital adequacy requirements; and
- inputting to and subsequently adopting the NatWest Group Remuneration Policy Principles on behalf of NWB and the other entities within the NWH Sub Group.

The NWH RemCo must be able to act independently and the non-executive directors serving on it are supported by the necessary entity-specific management information in order to carry out their duties. The NWH RemCo met nine times in 2022. UK REM1 and UK REM5 - Total remuneration awarded to MRTs for the financial year

The breakdown by business areas required in template UK REM5 has been combined with UK REM1 above, as permitted under regulatory guidance for the templates.

Fixed remuneration consists of salaries, allowances, pension and benefit funding.

Variable remuneration consists of a combination of annual bonus and RSP awards, deferred over a four to seven year period in accordance with regulatory requirements; and (where applicable) severance payments. Under the NatWest Group bonus deferral structure, immediate cash awards are limited to £2,000 per person, with a further payment of cash and shares within Year 0.

RSP awards vest subject to the extent to which performance conditions are met and can result in zero payment.

Under the regulations, a notional discount is available which allows variable pay to be awarded at a level that would otherwise exceed the 1:1 ratio, provided that variable pay is delivered 'in instruments' (shares) and deferred over five years or more. The discount rate was used for remuneration awarded in respect of the 2022 performance year to two colleagues.

#### **UK REMA - Derogations**

The regulations allow some flexibility not to apply certain requirements that would normally apply to MRTs where an individual's annual variable remuneration does not exceed £44,000 and does not represent more than one third of the individual's total annual remuneration (derogations permitted under point (b) of Article 94(3) of CRD V). We have used this flexibility to disapply MRT rules relating to deferral and delivery of awards in shares for 78 MRTs in respect of performance year 2022. Total remuneration for these individuals in 2022 was £10.73 million, of which £9.06 million was fixed pay and £1.66 million was variable pay.

#### UK REMA - Ratio between fixed and variable remuneration

The variable component of total remuneration for MRTs at NatWest Group shall not exceed 100% of the fixed component (except where local jurisdictions apply a lower maximum ratio for variable pay). The average ratio between fixed and variable remuneration for 2022 was approximately 1 to 0.55 The majority of MRTs were based in the UK.

#### UK REM2 - Guaranteed awards (including 'sign-on' awards) and severance payments
