### Forward-looking statements

This document contains forward-looking statements within the meaning of the United States Private Securities Litigation Reform Act of 1995, such as statements that include, without limitation, the words 'expect', 'estimate', 'project', 'anticipate', 'commit', 'believe', 'should', 'intend', 'will', 'plan', 'could', 'probability', 'risk', 'Value-at-Risk (VaR)', 'target', 'goal', 'objective', 'may', 'endeavour', 'outlook', 'optimistic', 'prospects' and similar expressions or variations on these expressions. These statements concern or may affect future matters, such as NatWest Group's future economic results, business plans and strategies. In particular, this document may include forward-looking statements relating to NatWest Group plc in respect of, but not limited to: the impact of the COVID-19 pandemic, its regulatory capital position and related requirements, its financial position, profitability and financial performance (including financial, capital, cost savings and operational targets), the implementation of its purpose-led strategy, its ESG and climate-related targets, its access to adequate sources of liquidity and funding, increasing competition from new incumbents and disruptive technologies, its exposure to third party risks, its ongoing compliance with the UK ring-fencing regime and ensuring operational continuity in resolution, its impairment losses and credit exposures under certain specified scenarios, substantial regulation and oversight, ongoing legal, regulatory and governmental actions and investigations, the transition of LIBOR and IBOR rates to alternative risk free rates and NatWest Group's exposure to economic and political risks (including with respect to terms surrounding Brexit and climate change), operational risk, conduct risk, cyber, data and IT risk, financial crime risk, key person risk and credit rating risk. Forward-looking statements are subject to a number of risks and uncertainties that might cause actual results and performance to differ materially from any expected future results or performance expressed or implied by the forward-looking statements. Factors that could cause or contribute to differences in current expectations include, but are not limited to, the impact of the COVID-19 pandemic, future growth initiatives (including acquisitions, joint ventures and strategic partnerships), the outcome of legal, regulatory and governmental actions and investigations, the level and extent of future impairments and write-downs (including with respect to goodwill), legislative, political, fiscal and regulatory developments, accounting standards, competitive conditions, technological developments, interest and exchange rate fluctuations, general economic and political conditions and the impact of climate-related risks and the transitioning to a net zero economy. These and other factors, risks and uncertainties that may impact any forward-looking statement or NatWest Group plc's actual results are discussed in NatWest Group plc's UK 2021 Annual Report and Accounts (ARA), NatWest Group plc's Interim Results for Q1 2022 and NatWest Group plc's filings with the US Securities and Exchange Commission, including, but not limited to, NatWest Group plc's most recent Annual Report on Form 20-F and Reports on Form 6-K. The forward-looking statements contained in this document speak only as of the date of this document and NatWest Group plc does not assume or undertake any obligation or responsibility to update any of the forward-looking statements contained in this document, whether as a result of new information, future events or otherwise, except to the extent legally required.

#### Presentation of information

The Pillar 3 disclosures in this supplement complement those in NatWest Group's Q1 Interim Management Statement (IMS).

As of the date of this report, NatWest Group plc is regulated under the UK Capital Requirements Regulation (CRR) and the associated onshored binding technical standards that were created by the European Union (Withdrawal) Act 2018. The CRR has subsequently been amended by a number of statutory instruments and is split across primary legislation and the PRA rulebook.

NatWest Group's consolidated disclosures and those for its large subsidiaries that are UK entities are presented in accordance with the Disclosure (CRR) part of the PRA rulebook. The disclosures required under the PRA framework are substantially equivalent to those required by Part Eight of the EU CRR.

Disclosures for large subsidiaries that are non-UK entities are calculated in accordance with the regulatory requirements applicable in the countries in which they are incorporated. However, they are presented using the prescribed disclosure templates in the PRA rulebook.

Based on the criteria set out in the CRR, NatWest Group plc primarily defines its large subsidiaries as those designated as an Other Systemically Important Institution (O-SII) by the national competent authority or those with total assets equal to or greater than €30 billion.

At 31 March 2022, NatWest Group had the following large subsidiaries:

- National Westminster Bank Plc (NWB Plc)
- The Royal Bank of Scotland plc (RBS plc)
- Ulster Bank Ireland Designated Activity Company (UBIDAC)
- NatWest Markets Plc (NWM Plc)
- Coutts & Company (Coutts & Co)
- The Royal Bank of Scotland International Limited (RBSI)

This supplement presents large subsidiary disclosures for NWM Plc, RBSI and – for completeness – the consolidated NatWest Holdings Group (NWH Group). Refer to the NWH Group Q1 2022 Pillar 3 Supplement for disclosures related to the remaining large subsidiaries; NWB Plc, RBS plc, UBIDAC and Coutts & Co.

Row and column references are based on those prescribed in the PRA templates.

#### Regulatory developments

The UK rules on disclosures were finalised as part of the PRA's policy statement PS22/21 in October 2021 and are now incorporated in the PRA rulebook.

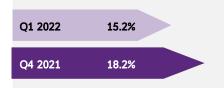

PS22/21 also formally introduced the new standardised approach for counterparty credit risk (SA-CCR) as well as rule changes for the calculation of the net stable funding ratio (NSFR) and the liquidity coverage ratio (LCR). NatWest Group implemented these changes from 1 January 2022. Affected disclosures in this document are presented in accordance with the new calculation requirements where applicable.

NatWest Group has implemented changes reflecting the new definition of default. Additionally, new regulation applicable to internal ratings based (IRB) models from 1 January 2022 has resulted in NatWest Group applying temporary model adjustments, with the most material adjustment for mortgages. Affected disclosures in this document are presented in accordance with the new requirements.

Finally, the Financial Policy Committee and the PRA published policy statement PS21/21 in October 2021 introduced changes to the UK leverage ratio framework. As a result of these changes, all firms not in scope of the minimum leverage capital requirements are expected to manage their leverage ratio at the same levels as firms in scope (LREQ firms), with the minimum being 3.25% from 1 January 2022. NatWest Group and NWH Group are currently in scope for the minimum leverage ratio capital requirements (LREQ firms) and are therefore also subject to additional disclosure requirements from 1 January 2022. Entities that are new to the minimum leverage ratio capital requirements will be subject to the minimum requirements and additional disclosures from 1 January 2023.

### NatWest Group - key points

#### CET1 ratio

The CET1 ratio decreased by 300 basis points to 15.2%. The decrease is primarily due to a £19.8 billion increase in RWAs and a £1.7 billion decrease in CET1 capital.

The CET1 decrease is mainly driven by:

- the directed buyback of £1.2 billion;
- foreseeable dividend accrual of £0.3 billion;
- a £0.2 billion decrease in the IFRS 9 transitional adjustment;
- the removal of adjustment for prudential amortisation on software development costs of £0.4 billion;
- a £0.3 billion decrease due to FX loss on retranslation on the redemption of a USD instrument; and
- other reserve movements.
- These reductions were partially offset by the £0.8 billion attributable profit in the period.

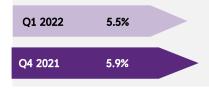

#### **RWA**

Q1 2022	£176.8bn
Q4 2021	£157.0bn

Total RWAs increased by £19.8 billion to £176.8 billion during the period reflecting:

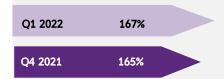

- An increase in credit risk RWAs of £20.3 billion due to model adjustments applied as a result of new regulation applicable to IRB models from 1
  January 2022 and increased exposures within Commercial & Institutional and Retail Banking. This was partially offset by improved risk metrics in both Retail Banking and Commercial & Institutional.
- Operational risk RWAs reduced by £1.9 billion following the annual recalculation conducted in Q1 2022.
- Counterparty credit risk RWAs increased by £0.9 billion mainly driven by the implementation of SA-CCR impacting the RWA calculation for the noninternal modelled exposure in addition to an increase in the CVA multiplier.
- Market risk RWAs increased by £0.6 billion driven by an increase in the capital multiplier for NWM Plc impacting VaR and SVaR calculations.

#### UK leverage ratio

The leverage ratio at 31 March 2022 is 5.5% and has been calculated in accordance with changes to the UK's leverage ratio framework which were introduced by the PRA and came into effect from 1 January 2022. As at 31 December 2021, the UK leverage ratio was 5.9%, which was calculated under the prior year's UK leverage methodology. The key driver of the decrease in the quarter is a £2.3 billion decrease in Tier 1 capital.

#### **LCR**

The average LCR ratio has increased 2% over the previous quarter. The main drivers include a significant increase in customer deposits and drawings from TFSME offset by increased customer lending, redemption/maturing issuance, share buybacks and repayment of TLTRO.

#### **NSFR**

Q1 2022	152%	
Q4 2021	157%	

The net stable funding ratio (NSFR) for Q1 2022 was 152% compared to 157% at Q4 2021. The decrease is mainly due to an increase in loans and share buyback.

### UK KM1: Key metrics

The table below provides a summary of the main prudential regulation ratios and measures. Capital ratios and measures are presented on a transitional basis, therefore include permissible adjustments for the extended CRR2 grandfathering provisions and remaining IFRS 9 relief. NatWest Group has elected to take advantage of the IFRS 9 transitional capital rules in respect of ECL provisions. The revised transitional amendments will maintain a CET1 add-back of relevant ECL provisions until 31 December 2024.

20 <b>N</b>	SFR ratio (%)	152	157	155	154	153

The institution specific countercyclical capital buffer requirement is based on the weighted average of the buffer rates in effect for the countries in which institutions have exposures. Represents the CET1 ratio less CET1 currently used to meet SREP requirements (Pillar 1 & 2A).

The liquidity coverage ratio (LCR) uses the simple average of the preceding 12 monthly periods ending on the quarterly reporting date as specified in the table. Additional disclosure requirements for LREQ firms from 1 January 2022 therefore comparatives were not presented.

The following rows are not presented in the table above because they have zero values: UK8a, UK9a, 10 and UK10a.

# IFRS 9-FL<sup>(1)</sup>: Comparison of institutions' own funds and capital and leverage ratios with and without the application of transitional arrangements for IFRS 9 or analogous ECL

The table below shows key prudential regulation ratios and measures with and without the application of IFRS 9 transitional relief. NatWest Group has elected to take advantage of the transitional capital rules in respect of ECL provisions. Following the adoption of IFRS 9 from 1 January 2018, the CRR introduced transitional rules to phase in the full CET1 effect over a five-year period. The revised transitional amendments will maintain a CET1 add-back of relevant ECL provisions until 31 December 2024. Capital measures in this table are presented in line with table UK KM1. The transitional basis rules do not apply to RBSI and therefore only end-point basis values are disclosed for this subsidiary.

#### Large subsidiary key points

#### Capital and leverage

#### NWH Group - 31 March 2022 compared with 31 December 2021

- The CET1 ratio decreased to 13.9% from 15.9%, driven by an increase in RWAs of £17.9 billion.
- CET1 capital increased by £6 million primarily due a £0.2 billion decrease in the IFRS 9 transitional adjustment, the removal of adjustment for prudential amortisation on software development costs of £0.4 billion and other reserve movements, offset by an attributable profit in the period of £0.9 billion.
- Total RWAs increased by £17.9 billion mainly reflecting an increase in credit risk RWAs of £18.9 billion due to model
  adjustments applied as a result of new regulation applicable to IRB models from 1 January 2022. Operational risk RWAs
  reduced by £0.7 billion following the annual recalculation. Counterparty credit risk reduced £0.2 billion reflecting a reduction in
  exposures.
- The leverage ratio at 31 March 2022 is 5.6% and has been calculated in accordance with changes to the UK's leverage ratio framework which were introduced by the PRA and came into effect from 1 January 2022. As at 31 December 2021, the UK leverage ratio was 5.6%, which was calculated under the prior year's UK leverage methodology.

#### NWM Plc - 31 March 2022 compared with 31 December 2021

- The CET1 ratio decreased to 16.6% from 17.9%, driven by an increase in RWAs of £1.4 billion.
- CET1 capital decreased £0.1 billion and reflected a decrease in other reserves offset by impact of a decrease in regulatory capital deductions.
- Total RWAs increased by £1.4 billion, mainly reflecting a £0.8 billion increase in counterparty credit risk mainly driven by the implementation of SA-CCR impacting the RWA calculation for the non-internal modelled exposure and an increase in the CVA multiplier. Credit risk RWAs increased by £0.8 billion driven by new facilities & drawdowns within Commercial & Institutional. Market risk RWAs increased by £0.4 billion driven by an increase in the capital multiplier for NWM Plc impacting VaR and SVaR calculations partially offset by a reduction in eurozone government bond positions. Operational risk RWAs reduced by £0.5 billion following the annual recalculation in Q1 2022.
- The leverage ratio at 31 March 2022 is 4.7% and has been calculated in accordance with changes to the UK's leverage ratio framework which were introduced by the PRA and came into effect from 1 January 2022. As at 31 December 2021, the UK leverage ratio was 4.8%, which was calculated under the prior year's UK leverage methodology.

#### RBSI - 31 March 2022 compared with 31 December 2021

- The RBSI CET1 ratio increased to 21.6%, with final prior year retained earning of £0.1 billion added to the capital base.
- RWAs increased to £7.5 billion reflecting an increase in credit risk RWAs, due to model adjustments applied as a result of new regulation applicable to IRB models from 1 January 2022.
- The leverage ratio increased to 4.6% from 4.2% at 31 December 2021. This was driven by decreased balance sheet size as a
  result of customer deposit decreases.

#### UK CC1<sup>(1)</sup>: Composition of regulatory own funds

The table below shows a summary of capital resources for NatWest Group and its large subsidiaries using an abridged version of the disclosure template UK CC1. The capital ratios and measures presented in this table are shown on a transitional basis, therefore include permissible adjustments for the extended CRR2 grandfathering provisions and IFRS 9 transitional relief. The transitional basis rules do not apply to RBSI and therefore only end-point basis values are disclosed for this subsidiary.

# UK LR1 - LRSum<sup>(1)</sup>: Summary reconciliation of accounting assets and leverage ratio exposures

The table below shows a reconciliation between the total assets under IFRS standards and the leverage exposure measure for NatWest Group and its large subsidiaries The leverage metrics for NatWest Group, NWH Group and NWM Plc are calculated in accordance with the Leverage Ratio (CRR) part of the PRA Rulebook. The leverage metrics for RBSI are calculated in accordance with Jersey regulatory rules which do not permit the exclusion of claims on central banks.

31 March 2022

13	Total exposure measure	564,418	420,304	100,712	42,188

<sup>(1)</sup> In accordance with the Disclosure (CRR) part of the PRA rulebook, the standard disclosure frequency of UK LR1 - LRSum is semi-annual.

# UK LR2 - LRCom: Leverage ratio common disclosure

The table below shows an abridged version of the disclosure template UK LR2 - LRCom for NatWest Group and its large subsidiaries. The leverage metrics for NatWest Group, NWH Group and NWM Plc are calculated in accordance with the Leverage Ratio (CRR) part of the PRA Rulebook. The leverage metrics for RBSI are calculated in accordance with local regulatory rules.

		31 March 2022			
		NatWest	NWH	NWM	
		Group (1)	Group (1)	Plc	RBSI (2)
Capital a	ınd total exposure measure	£m	£m	£m	£m
UK-24b	Total exposure measure excluding claims on central banks	564,418	420,304	100,712	
Leverage	e ratio				
25	Leverage ratio excluding claims on central banks (%)	5.5	5.6	4.7	
	Fully loaded ECL accounting model leverage ratio excluding claims on central banks (%)	5.4	5.5	4.7	
UK-25c	Leverage ratio including claims on central banks (%)	4.2	4.2	4.1	4.6
Addition	al leverage ratio disclosure requirements - leverage ratio buffers				
27	Leverage ratio buffer (%)	0.0	0.5		
UK-27b	Of which: countercyclical leverage ratio buffer (%)	0.0	0.0		
Addition	al leverage ratio disclosure requirements - disclosure of mean values				
UK-31	Average total exposure measure excluding claims on central banks	563,223	418,418		
UK-32	Average total exposure measure including claims on central banks	729,847	553,522		
UK-33	Average leverage ratio excluding claims on central banks (%)	5.6	5.5		
UK-34	Average leverage ratio including claims on central banks (%)	4.3	4.1		

<sup>(1)</sup> NatWest Group & NWH Group are LREQ firms therefore subject to the additional quarterly disclosures for averaging and countercyclical leverage ratio buffer.

<sup>(2)</sup> The leverage metrics for RBSI are calculated in accordance with Jersey regulatory rules which do not permit the exclusion of claims on central banks. Total exposure excluding claims on central banks would be £27,700 million and leverage ratio excluding claims on central banks would be 6.9%

#### UK LIQ1: Quantitative information of LCR

The tables below show the breakdown of high-quality liquid assets, cash inflows and cash outflows, on both an unweighted and weighted basis, that are used to derive the liquidity coverage ratio for NatWest Group, NWH Group and NWM Plc. The weightings applied reflect the stress factors applicable under the UK LCR rules. The values presented are the simple average of the preceding monthly periods ending on the quarterly reporting date as specified in the table. LCR outflows do not capture all liquidity risks (e.g. intra-day liquidity). NatWest Group assesses these risks as part of its Individual Liquidity Adequacy Assessment Process and maintains appropriate levels of liquidity. The RBSI liquidity measures are presented in accordance with local regulatory rules.

# UK LIQB: Qualitative information on LCR, which complements template UK LIQ1

Qualitative information	NatWest Group  The LCR aims to ensure that Banks and Banking Groups hold a sufficient reserve of High-Quality Liquid Assets (HQLA) to survive a period of liquidity stress lasting 30 calendar days.	NWM Plc  The LCR aims to ensure that Banks hold a sufficient reserve of High-Quality Liquid Assets (HQLA) to survive a period of liquidity stress lasting 30 calendar days.	RBSI
Explanations on the main drivers of LCR results and the evolution of the contribution of inputs to the LCR's calculation over time	The LCR is prepared in accordance with the Liquidity Coverage Ratio (CRR) part of the PRA Rulebook, subject to modification of Article 10(1)(c)(i), (ii) and (iv), Article 10(1)(d)(i) and Article 11(1)(b) effective from 1 January 2022, as per Directive given by PRA under section 138A of FSMA.  Following the UK exit from the European Union the relevant BCBS liquidity standards have been incorporated into the UK regulatory framework by inclusion in the Prudential Regulatory Authority (PRA) Rulebook. The UK liquidity rules came into effect on 1 January 2022. Prior to this, NatWest Group plc was subject to similar rules due to the onshoring of the Capital Requirements Regulation (575/2013) (CRR).	The LCR is prepared in accordance with the Liquidity Coverage Ratio (CRR) part of the PRA Rulebook, subject to modification of Article 10(1)(c)(i), (ii) and (iv), Article 10(1)(d)(i) and Article 11(1)(b) effective from 1 January 2022, as per Directive given by PRA under section 138A of FSMA.  Following the UK exit from the European Union the relevant BCBS liquidity standards have been incorporated into the UK regulatory framework by inclusion in the Prudential Regulatory Authority (PRA) Rulebook. The UK liquidity rules came into effect on 1 January 2022, prior to this NWM Plc was subject to similar rules due to the onshoring of the Capital Requirements Regulation (575/2013) (CRR).	The LCR aims to ensure that Banks and Banking Groups hold a sufficient reserve of High-Quality Liquid Assets (HQLA) to survive a period of liquidity stress lasting 30 calendar days. The RBSI LCR presented in the LIQ1 is prepared in accordance local requirements under the Jersey Financial Services Commission's Deposit-taking Business Code of Practice and their interpretation of guidance issued by the Basel Committee on Banking Supervision.
	All figures included in the table represent a 12 month rolling average for the period April 2021 - March 2022.	All figures included in the table represent a 12 month rolling average for the period April 2021 - March 2022.	
Explanations on the	As at 31 March 2022 the LCR ratio for NatWest Group plc was 167% or £83 billion of excess over the regulatory minimum of 100%. This compares to 161% as at 30 April 2021 or £69 billion of excess over the regulatory minimum of 100%.	As at 31 March 2022 the LCR ratio for NWM Plc was 216% or £9 billion of excess over the regulatory minimum of 100%. This compares to 233% as at 30 April 2021 or £10 billion of excess over the regulatory minimum of 100%.  The average LCR ratio for the 12 months to 31 March	The average LCR for the 12 month period up to and including 31 March 2022 has decreased by 1% over the
changes in the LCR over time	The average LCR ratio for the 12 months to 31 March 2022 has increased 2% over the previous quarter, from 165% to 167%. The main drivers include a significant increase in customer deposits and drawings from TFSME offset by increased customer lending, redemption/maturing issuance, share buybacks and repayment of TLTRO.	2022 has decreased by 5% over the previous quarter, from 224% to 219%. The decrease in average LCR is primarily due to reduction in average HQLA balances over the period due to planned return of excess capital to (includes redemption of internal MREL instrument) NatWest Group plc and growth strategy in our Capital Markets business.	previous rolling period of January 2021 – December 2021 driven by an increase in customer lending offset by an increase in wholesale funding.

# UK LIQB: Qualitative information on LCR, which complements template UK LIQ1 continued

Oualitative information	NatWest Group	NWM Plc	RBSI
Explanations on the actual concentration of funding sources	NatWest Group plc maintains a diversified set of funding sources of which retail, SME and corporate deposits are the biggest contributors. Other sources include wholesale unsecured funding, capital (including equity and MREL-eligible bonds), central banks (TFSME), repos, covered bonds and derivative cash collateral. Wholesale unsecured funding includes a range of products including deposits, commercial paper, certificates of deposit and medium term notes, and is accepted from various corporate counterparties and financial institutions.	NWM Plc covers its funding requirements with secured and unsecured wholesale funding from a wide depositor and investor base. Repo, short positions and derivative cash collateral provide approximately half of the balance sheet funding with the remainder funded by capital & MREL-eligible bonds (issued and downstreamed by NatWest Group plc), term unsecured, short term unsecured and secured funding.  Wholesale unsecured funding includes a range of products including but not limited to bank deposits, commercial paper (CP), certificates of deposit (CD) and medium term notes (MTN). Deposits, CP and CD have tenors typically less than a year and are accepted from various corporate counterparties and financial institutions. MTN issuance is through both public benchmark transactions and smaller private placements, and typically has a tenor beyond a year.  The primary risk to funding stability is refinancing, the ability to replace maturing funding with new or rolled transactions. The risk is mitigated through diversification to prevent concentrations and mismatches in the funding profile. NWM Plc monitors and manages funding concentration risk across tenors, counterparties, currencies, products and markets.	RBSI is deposit-led, with deposits from Funds and Financial Intermediaries comprising the largest share along with retail deposits in RBSI's local jurisdictions. Additionally, RBSI has a commercial paper issuance programme.
High-level description of the composition of the institution's liquidity buffer	HQLA is primarily held in Level 1 cash and central bank reserves (81%) and Level 1 high quality securities (19%).	HQLA is primarily held in Level 1 cash and central bank reserves (76%) and Level 1 high quality securities (24%).	RBSI Liquid Asset Buffer is made up of Level 1 HQLA in line with its Risk appetite, the majority of HQLA is held in central bank placements with the Bank of England and Banque Centrale du Luxembourg averaging at 74% with the remaining 26% comprised of Level 1 Government backed securities.

# UK LIQB: Qualitative information on LCR, which complements template UK LIQ1 continued

Qualitative information	NatWest Group	NWM Plc	RBSI
Derivative exposures and potential collateral calls	NatWest Group plc actively manages its derivative exposures and potential calls, including both due collateral and excess collateral, with derivative outflows under stress captured under the Historical Look Back Approach which considers the impact of an adverse market scenario on derivatives. Potential collateral calls under a 3 notch downgrade of the credit ratings of the entities within NatWest Group plc are also captured.	NWM Plc actively manages its derivative exposures and potential calls, including both due collateral and excess collateral, with derivative outflows under stress are captured within the Historical Look Back Approach which considers the impact of an adverse market scenario on derivatives. Potential collateral calls under a 3 notch downgrade of the NWM Plc credit rating are also captured.	RBSI has limited derivatives exposures. These are predominantly linked to simple FX swaps with customers, and FX and interest rate swaps executed for hedging and treasury management purposes.
Currency mismatch in the LCR	The LCR is calculated for EUR, USD and GBP which have been identified as significant currencies (having liabilities > 5 % of total group liabilities excluding regulatory capital and off balance sheet liabilities) in accordance with the Liquidity Coverage Ratio (CRR) part of the PRA Rulebook (subject to modification). NatWest Group plc manages currency mismatch for significant currencies according to its internal liquidity adequacy assessment framework. #### RWA movement tables

#### UK CR8: RWA flow statement of credit risk exposures under the IRB approach

The table below shows movements in RWAs for credit risk exposures under the internal ratings based (IRB) approach for NatWest Group and its large subsidiaries. It excludes counterparty credit risk, securitisations and non-credit obligation assets.

		а			
	RWAs				
	NatWest Group	NWH Group	NWM Plc	RBSI	
	£m	£m	£m	£m	
<sup>1</sup> At 31 December 2021	95,281	83,846	3,258	4,848	
<sup>2</sup> Asset size	1,762	769	737	(188)	
3 Asset quality	(1,144)	(1,137)	(81)	141	
4 Model updates	19,198	19,066	_	132	
<sup>5</sup> Methodology and policy	167	167	_	_	
<sup>7</sup> Foreign exchange movements	261	185	36	26	
9 At 31 March 2022	115,525	102,896	3,950	4,959	

<sup>(1)</sup> The following rows are not presented in the table because they had zero values for the period: row (6) Acquisitions and disposals, and row (8) Other.

- The increase in RWAs relating to model updates and methodology was due to adjustments as a result of new regulations applicable to IRB models from 1 January 2022.
- The increase in asset size for NatWest Group was mainly due to new syndicates and loans in Commercial & Institutional. There
  were additional increases within Retail Banking primarily in the mortgage portfolio.
- The reduction relating to asset quality for NatWest Group primarily reflected improved risk metrics within Retail Banking.
- The increase in foreign exchange movements for NatWest Group was mainly a result of sterling weakening against the US dollar during the period.

# UK CCR7: RWA flow statement of counterparty credit risk exposures under the IMM

The table below shows movements in RWAs for derivatives under the internal model method (IMM) for NatWest Group and NWM Plc. It excludes the CVA capital charge and exposures to central counterparties and securitisations. NWM Plc is the only large subsidiary of NatWest Group with an IMM waiver for counterparty credit risk.

		α	
		RWA	As .
		NatWest Group	NWM Plc
		£m	£m
1	At 31 December 2021	4,100	3,735
2	Asset size	(2)	(49)
3	Credit quality of counterparties	(5)	(5)
7	Foreign exchange movements	72	41
9	At 31 March 2022	4,165	3,722

<sup>(1)</sup> RWAs for NatWest Group at 31 December 2021 presented in the table differ from those disclosed in the 2021 Pillar 3 Report due to the change in scope under the new UK regulatory framework.

regulatory framework.

(2) The following rows are not presented in the table because they had zero values for the period: row (4) Model updates, row (5) Methodology and policy, row (6) Acquisitions and disposals, and row (8) Other.

The increase in foreign exchange movements for NatWest Group was mainly a result of sterling weakening against the US dollar during the period.

<sup>-</sup> For NWM Plc, the sterling depreciation against the US dollar was offset by the decrease in asset size.

### UK MR2\_B: RWA flow statement of market risk exposures under the IMA

The table below shows movements in RWAs and own funds requirements for market risk exposures under the internal model approach (IMA) for NatWest Group and NWM Plc. NWM Plc is the only large subsidiary of NatWest Group with an IMA waiver for market risk.

8	At 31 March 2022	1,747	3,099	904	1,130	6,880	550

<sup>(1)</sup> Regulatory adjustments in row 1a and 8b represent the difference in RWA terms between the risk spot measure at the end of the reporting period and the 60-day average of that measure, multiplied by the multiplication factor.

- Overall, market risk RWAs for NWM Plc which accounted for the majority of NatWest Group's exposure increased.
- The higher VaR and SVaR-based RWAs reflected the effect of an increase in the capital multiplier for NWM Plc. Regulatory VaR back-testing exceptions increased in Q1 2022 given market movements amid global inflationary concerns and geopolitical tensions
- The decrease in RNIV-based RWAs was mainly due to reduction in the RNIV aimed at capturing the residual risk of LIBOR cessation.
- The lower incremental risk charge reflected a reduction in eurozone government bond positions.

<sup>(2)</sup> The following rows and/or columns are not presented in the table because they had zero values for the period or are not used by NatWest Group: column (d) Comprehensive risk measure, row (4) Methodology and policy, row (5) Acquisitions and disposals, row (6) Foreign exchange movements and row (7) Other.
